Cotechnoe's Optimized Deployment of Apache Jena Fuseki Now Available in the Microsoft Azure Marketplace

Microsoft Azure customers worldwide now gain access to Apache Jena Fuseki to take advantage of the scalability, reliability, and agility of Azure to drive application development and shape business strategies.

Montreal, Quebec, Canada — Cotechnoe Inc., a specialist in artificial intelligence and semantic web technologies, today announced the availability of its optimized deployment of Apache Jena Fuseki in the Microsoft Azure Marketplace, an online store providing applications and services for use on Azure. Cotechnoe customers can now leverage the productive and trusted Azure cloud platform with streamlined deployment and ready-to-use integration.

Apache Jena Fuseki is a semantic web triplestore compliant with W3C standards, designed to manage RDF/RDFS graphs and query this data using the SPARQL query language. Cotechnoe's Azure offering provides a complete infrastructure for publishing and linking open data on the web, leveraging ontologies to ensure the consistency and semantics of the data. This architecture supports the creation of interoperable knowledge graphs, serving as a foundation for collaborative and intelligent solutions, including those powered by RAG-based (retrieval-augmented generation) generative AI, where the quality and richness of linked data are essential.

"We designed this offer to democratize access to robust semantic technologies while taking advantage of Azure's agility and security," said Michel Héon, PhD, Owner of Cotechnoe Inc. "Whether for universities, government agencies, or innovative enterprises, our Fuseki deployment on Azure helps clients structure and exploit their data in compliance with open standards, strengthening their technological autonomy."

"Microsoft Azure Marketplace welcomes Apache Jena Fuseki on Azure, which joins a cloud marketplace landscape offering flexibility and economic value while transacting tens of billions of dollars a year in revenues," said Jake Zborowski, General Manager, Microsoft Azure Platform at Microsoft Corp. "Thanks to Azure Marketplace and trusted partners like Cotechnoe, customers can do more with less by increasing efficiency, buying confidently, and spending smarter."

About Cotechnoe

Based in Quebec, Cotechnoe Inc. designs and deploys innovative technology solutions for Small and Medium-sized Enterprises and institutions, combining generative AI, semantic web, and cloud integration. An expert in Azure, AWS, and open-source technologies, Cotechnoe supports clients in developing contextualized GPT chatbots, implementing MediaWiki-based solutions, and intelligently ingesting data into retrieval-augmented generation (RAG) pipelines.
